DETAILED ACTION

1. This Office Action is in response to Remarks received 07/18/2007. Claims 1-8 and 11-22 are pending.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claims 1 and 2, as noted on page 8, 3rd paragraph, Gole fails to teach a second network coupling a plurality of channel controllers and a plurality of disk controllers, where software / firmware is written to a storage device by communicating with a channel controller via the second network.

Gole, and other cited prior arts, taken alone or in combination, fail to teach or suggest all limitations of independent claims 1 and 2, when taken in the context of the claims as a whole, including:

“writing software for enabling a file access processing section of a channel controller of the storage device controlling apparatus to function, wherein said storage device controlling apparatus comprises...a second network coupling said plurality of channel controllers and said plurality of disk controllers so as to be able to communicate with each other , wherein said software is written into said storage device by communicating with said channel controller via said second network.”

Art Unit: 2191

Thus all remaining dependent claims, claims 3-8 and 11-22, are allowed. Claims are to be renumbered in order.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
